### **DETAILED ACTION**

1. This application is in condition for allowance except for the following formal matters:

#### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the suspension of claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### ***Specification***

3. The disclosure is objected to because of the following informalities:

In the brief description of the drawing figures, the figures 3, 8, 9, 12, 14, 23, 24, and 29 are set forth but do not correspond to appropriate figures in the drawings. Specifically, for example, there is no figure 3 present but there is however, figures 3A, 3B, and 3C. Likewise, there is no figure 8 but there are instead Figures 8A and 8B. For the drawings figures set forth above, corrections should be made to this portion of the specification such that the brief description does indeed correspond with the drawing figures set forth.

On page 26, line 5, "that that" should simply be "that".

Appropriate correction is required.

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Specifically, the abstract states the term "is disclosed."

#### *Claim Objections*

6. Claims 3-4 and 16 are objected to because of the following informalities:

In claim 1, line 6, “one said” should perhaps be inserted before “peripheral edge”. Also on line 7, “the frame member” should perhaps be “one said frame member”.

In claim 3, line 3 should perhaps recite “have the joint, and the low-rigidity area is formed as a unit” for clarity.

With regard to claims 3 and 4, negative limitations in the claims are discouraged (such as “does not have” a feature; “where none” are provided; and is substantially “absent”). The applicant should instead positively recite the feature of the invention.

For claim 16, line 2, “one curved surface” should perhaps be “the curved surface” to refer back to claim 13, line 2. Appropriate correction is required.

#### *Allowable Subject Matter*

7. Claims 1-2, 5-15, and 17-22 are allowed.
8. Claims 3-4 and 16 are objected to as containing a minor informality, but would be allowable if rewritten to overcome the objections set forth above.

#### *Conclusion*

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
